

CONTENTS

- Fractional-order adaptive control of nonlinear aeroelastic system with wind disturbance
 LI Nailu, XU Wentao, LUO Ziwei, MU Anle (1)
- Influence of special additional deformation on high-speed train dynamic responses on an ultra-large span railway bridge
 SUN Zhi'ang, YANG Xinwen, ZHAO Wenbo, QI Zhigang (10)
- Instantaneous frequency identification based on data-driven adaptive variational nonlinear chirp mode decomposition
 YUAN Pingping, MAN Zhen, ZHAO Zhoujie, REN Weixin (18)
- Numerical simulation of plate-type debris considering mass eccentricity
 HUANG Peng, ZHOU Hualiang, LI Ziyu, LIN Huatan (26)
- Research on the equivalent impact force for steel columns under horizontal impact at column top
 YANG Menggang, ZHANG Yu, MENG Dongliang, HU Shangtao (35)
- Vibration isolation characteristics of wave impeding blocks in mitigating vibrations induced by 350 km/h high-speed trains moving in underground tunnels
 WU Zaixin, YUAN Zhe, YANG Jianjin, QU Shuai, LOU Panming, YANG Jizhong, ZHU Shengyang (45)
- Dynamic characteristics of a workover riser/workover tool system under the excitation of workover vessel motion
 LIU Xiuquan, LIU Zhaowei, WANG Kunqian, CHANG Yuanjiang, CHEN Guoming (54)
- Establishment and solution of a mathematical model of the drillstring vibration and analysis of dynamic release force during an up-jar operation in a vertical well
 WEI Qiang, LI Zifeng, ZHANG Jie (62)
- Experimental study and mechanical model of high vertical bearing capacity MRE bearings
 LÜ Yang, ZHANG Fanxing, ZHANG Yike (75)
- An isogeometric-analysis-based stiffness and mass spreading method for topology optimization of trusses subjected to dynamic loads in time domain
 JIANG Xudong, NIU Qiancheng, TENG Xiaoyan, WU Ziwang, WU Hao, LIAN Shanli (85)
- Rolling bearing fault study based on an improved multi-scale convolutional recurrent neural network
 DONG Shaojiang, HUANG Xiang, XIA Zongyou, ZOU Song (94)
- A study on mechanical properties of variable stiffness rubber bearings based on the stiffness matrix analysis method
 YANG Jing, PAN Wen, ZHANG Yanyan, CAI Zheng (106)
- A full-scale resonant bending test system and modal analysis of steel catenary risers
 XU Zexin, AN Chen, XIE Zhi, ZHANG Jixiang, LIM Frank (119)
- A study on vibration response of a flexible pipe subject to wave-current coupled effect
 WANG Jinnuo, CHEN Zhengshou (128)
- Correction of impact model test results using the similarity theory-study on steel tube concrete columns
 ZHENG Gang, XIAO Jianchun, GUO Hua, MA Kejian, QIU Yun (140)
- A study on the mechanical response and energy dissipation characteristics of coal-rock composite under cyclical impact loads
 YANG Ke, ZHENG Shizhang, LIU Wenjie, XU Rijie, ZHANG Zhainan, LIU Shuai, CHI Xiaolou (150)
- A direct fast iterative filtering and adaptive deep residual network based fault diagnosis method for rotating machinery
 TONG Jinyu, TANG Shiyu, ZHENG Jinde, YIN Zhuangzhuang, PAN Haiyang (162)
- Three-dimensional seismic isolation of single-layer spherical lattice shells using magnetorheological negative stiffness dampers
 ZHUANG Peng, YANG Jianing, ZHANG Guowei (172)
- Research on the influence of circumferential oil-groove width on the nonlinear vibration characteristics for a turbocharger rotor system
 ZHANG Congcong, ZHOU Yuzhe, MEN Rixiu, FU Xiaorui, FENG Zemin, CAI Changwang (183)

-
- A study on the seismic effect of the rubber damping layer in a shallow-buried and unsymmetrical pressure tunnel based on a shaking table test
 JIANG Xueliang, YANG Hui, YU Lei, QIN Shihui, SHEN Bo, WANG Haodong, LIN Hang (192)
- A construction method of material information flow during the milling process under vibration
 FAN Lili, JIANG Bin, ZHAO Peiyi, LI Shihang (200)
- A study on sound and vibration characteristics of a rudder-wing composite structure based on bi-directional fluid-solid coupling
 ZHANG Zhenhai, TONG Bo, QU Duo (213)
- An experimental study on wind-induced torsional aerodynamic instability of single-axis trackers under all wind directions
 MA Wenyong, WANG Hepeng, JI Yinfeng, ZOU Chuang (221)
- Damage identification of an offshore wind turbine supporting structure based on a CNN-GRU parallel network
 LI Xingjian, DIAO Yansong, LÜ Jianda, HOU Jingru (229)
- A study on the vertical water entry performance of a head jet supercavitating navigation body
 PENG Ruizhe, FENG Heying, XIANG Min, HOU Jie, FANG Ling (238)
- A vibration displacement reconstruction method for rotor systems based on an unknown input observer
 LI Wengheng, ZHU Changsheng (247)
- A study on aerodynamic interference-induced instability of hoisting cables
 LI Li, YAN Hubin, HAN Yan, WANG Wei, LI Chunguang, ZHOU Xuhui (255)
- An experimental study on the water entry mechanism of a cylinder with foam cap
 WANG Yueyang, CHEN Shaolu, LONG Jingbing, WANG Jiawei, CHEN Yingyu (263)
- Numerical analysis and experiments of the acoustic performance of a corrugated muffler
 WU Taiying, WEN Huabing, PAN Fei, GUO Junhua, SHEN Hua (275)
- Evolution law of vehicle-induced cumulative damage of a heavy duty railway tunnel lining structure
 RAO Chenjie, WANG Jingchun, WANG Dapeng, HOU Weihong, NIU Xing (282)
- Noise reduction design and research of an improved pyramidal sandwich plate coupled membrane-type acoustic metamaterial structure
 YANG Wenchao, YANG Tingfang, SU Sheng, XIE Zelong, HE Bin, YI Wei (289)
- Design and experimental study of window-type giant magnetostrictive transducer
 WANG Yifan, HE Xiping (298)
- Research on structure optimization and control simulation of linear motor active suspension
 WEI Wei, LI Baozuo, YU Songjian (305)
- A non-destructive testing method of concrete composite slabs based on GPR and PAUT
 SUN Zhaolin, YANG Lu, MA Yuefei, LIU Meiyu (318)

Aeronautics and Astronautics

- A time-domain spectral element method for wave propagation analysis of three-dimensional curved-edge structures
 YUE Maoling, YU Zexing, SUN Jiaying, XU Chao (325)
- Highly efficient uncertainty analysis of an integrated vibration-isolating metastructure based on global sensitivity
 WANG Dongxian, ZHAO Jianlei, ZHAO Weijia, ZHU Rui (334)

JOURNAL OF VIBRATION AND SHOCK

Vol. 43 No. 20 OCTOBER 2024

Editorial Office: 1954 Huashan Rd. Shanghai, 200030, China

Issuer Abroad: China National Publishing Industry Trading Corporation

(Post-Office Box No. 728, Beijing, China)
